

# SCALING WITHOUT NEW SHIFTS:

## HOW OTTOBOCK GERMANY DOUBLED OUTPUT WITH ORTIS™

Ottobock Germany wasn't looking for robots with bells and whistles. They needed more output, less labor strain, and consistent results across locations. ORTIS™ delivered.

### A TRUSTED PARTNER BEHIND THE PLATFORM

Ottobock wasn't just looking for a robot. They were looking for a partner. From quick answers to late-night follow-ups, the Roboticom team helped Ottobock stay confident and achieve their operational goals.

### ONE MACHINE, ONE GLOBAL STANDARD

After positive experiences across several sites, Ottobock made ORTIS™ its global platform. With shared programming, repeatable workflows, and a responsive support team, ORTIS™ became more than a tool—it became a standard.

### SCALING CAPACITY WITHOUT ADDING SHIFTS

In Duderstadt, demand was rising—but labor capacity wasn't. Rather than move to double shifts, Ottobock installed a second ORTIS™ system. The result? Twice the throughput per square meter of production space, without increasing complexity or headcount.

***"The machine is reliable. The service is fast. And the communication is always good. That's what we need in a partner."***

Carsten Mönicke, Business Development Manager at Ottobock

# OTTOBOCK TRUSTS ORTIS™

Two ORTIS™ systems now run full shifts at Ottobock's Duderstadt facility, doubling production without expanding footprint or staff. The performance was strong enough that Ottobock named ORTIS™ its global robotic carver standard.

## FEATURES

### VERSATILITY

ORTIS™ supports complex shaping and digital trim line cutting with no physical retooling, just smart modeling. Workflows are also managed by a barcode system that automatically assigns the right tool paths to eliminate input errors.

### CONSISTENCY AND CONTROL

Ottobock now standardizes workflows across international sites without losing flexibility or oversight. Each facility maintains local control while benefiting from shared knowledge and support.

# 2X

the throughput per square meter of production space.

## FEATURES

### RESPONSIVE SUPPORT

Roboticom's team consistently delivers when it matters, with fast answers, hands-on problem solving, and proactive follow-up that keeps teams running.

***"Every time I have a question, they are available. If not immediately, they call me back. That's the kind of relationship that matters."***

Carsten Mönicke, Business Development Manager at Ottobock
